

# Case Management/Discharge Planning

- Most insurance companies only allow 1-2 days for total knees and 1 day for total hips (its all based on how your are doing).
- We contact your insurance company and give them clinical updates.
- Once admitted we will help coordinate home health if you are unable to do outpatient therapy.
- We will also help coordinate getting you to a rehab if you are unable to go home from the hospital.
- We will coordinate getting a walker delivered before you go home if one is recommended by physical therapy.
- Someone from our office will visit you the day after surgery to start coordinating discharge plans.
